ABOUT ME

I like building solutions to real problems with clean, concise code. I'm naturally curious and eager to dive into the unknown. Written and verbal communication comes naturally to me. I want to build meaningful applications as a key contributor to an engineering team. Eventually I would like to lead a team of developers.

TOP SKILLS

Ruby, Rails, JavaScript, NodeJS, AngularJS, ReactJS, SQL, AWS

EXPERIENCE

EKO DEVICES

Aug. '15 - Jul. '16

FULL STACK SOFTWARE DEVELOPER

Berkeley, CA

Second developer at a 10-person medical device startup. Responsible for all aspects of the stack in a fast-paced, agile environment:

Ruby on Rails API

- Built and tested JSON endpoints consumed by both iOS and AngularJS.
- Wrote Ruby gem for seamless integration with Electronic Health Records.
- Created module to dynamically generate performant SQL queries allowing users to quickly search their patient records.

AngularJS Single-Page Application

- Built routes and templates to consume data from the Rails API.
- Wrote fully-responsive views with media queries and SCSS mixins.
- Created services to parse and format data.

Live Streaming Node Server

- Solely responsible for building Eko's live-streaming feature that allowed users to stream heart sounds to a web browser in real time.
- Microservice powered by NodeJS, Redis, and Websockets.

Dev Ops

- Deployed all features to production with Amazon Web Services.
- Load-balanced and auto-scaled to handle high volumes of traffic.

JG BLACKBOOK

Sept. '12 - Oct. '14

SALES MANAGER

New York, NY

PROJECTS

DRUM SEQUENCER

[Demo](#) | [GitHub](#)

A programmable drum sequencer in your browser.

NRMLZ

[Demo](#) | [GitHub](#)

An audio file normalizer.

EDUCATION

FORDHAM UNIVERSITY

Class of 2011

BA BUSINESS ADMINISTRATION

New York, NY
